United Resources

COMPANY PROFILE

Al-Mafraq, Hashemite Kingdom of Jordan

⚙️ Who are we

United Resources for Aluminum was founded in 1986 in Al-Mafraq, with a vision to provide innovative aluminum and glass solutions that make architecture easier, safer, and more beautiful.

Since its establishment, the company has specialized in delivering high-quality architectural aluminum systems with flexible execution schedules, built on decades of expertise and a fully qualified workforce.

⚙️ Our Vision

To be a market leader in architectural aluminum systems and related services, driven by continuous improvement, integrity, teamwork, and innovation. Our vision is the roadmap for sustainable growth and uncompromised quality.

⚙️ Our Mission

To deliver advanced, exceptionally high-quality aluminum and glass solutions by supporting motivated and skilled individuals. We value long-term relationships with our clients, built on quality, safety, timely delivery, and trust.

⚙ Our Core Values

- **Absolute Quality:** No compromise on the quality of supplied materials or manufacturing precision.
- **Commitment & Reliability:** We honor our promises and timelines with meticulous accuracy.
- **Transparency & Integrity:** Clarity and credibility in all our dealings and contracts.
- **Development & Innovation:** Keeping pace with global architectural and technological progress.
- **Client-Centricity:** Client satisfaction is the primary driver of our success and growth.

⚙️ What Sets Us Apart

- **A Legacy of Experience:** Four decades in the Jordanian market give us deep insight into modern construction needs.
- **An Elite Engineering Team:** Technical talent with up to 24 years of expertise in complex system design and fabrication.
- **Advanced Insulation Solutions:** High efficiency in thermal insulation, sound insulation, and weather resistance.
- **Design Flexibility:** Fully customized profiles and solutions tailored to each project's architectural vision.
- **After-Sales Support:** A dedicated maintenance team ensures sustained performance beyond handover.

⚙ Manufacturing & Technological Capabilities

United Resources for Aluminum operates an advanced industrial infrastructure that allows us to meet demand across projects of every scale.

- **State-of-the-Art Production Lines:** The latest industrial machinery ensures precision cutting and assembly.
- **Strict Quality Systems:** Every product undergoes rigorous inspection to meet international specifications.
- **Logistics & Rapid Supply:** Strong supply chains guarantee timely availability of genuine materials and accessories.

UNITED RESOURCES FOR ALUMINUM

⚙️ Featured Product — Pivot Door

Our Pivot Door System is engineered for architectural statement entrances, combining structural performance with refined, minimalist design. A 100% aluminum internal structure and fully welded construction deliver exceptional rigidity, longevity, and precise alignment even at large, double-height openings.

- **Maximum Thickness:** Up to 85mm single skin panel.
- **Load Capacity:** Precision pivot mechanism rated up to 1000 kg.
- **Double Sealing System:** Total weatherproofing around the entire perimeter.
- **Low Maintenance:** Corrosion-resistant and dimensionally stable in all climates.

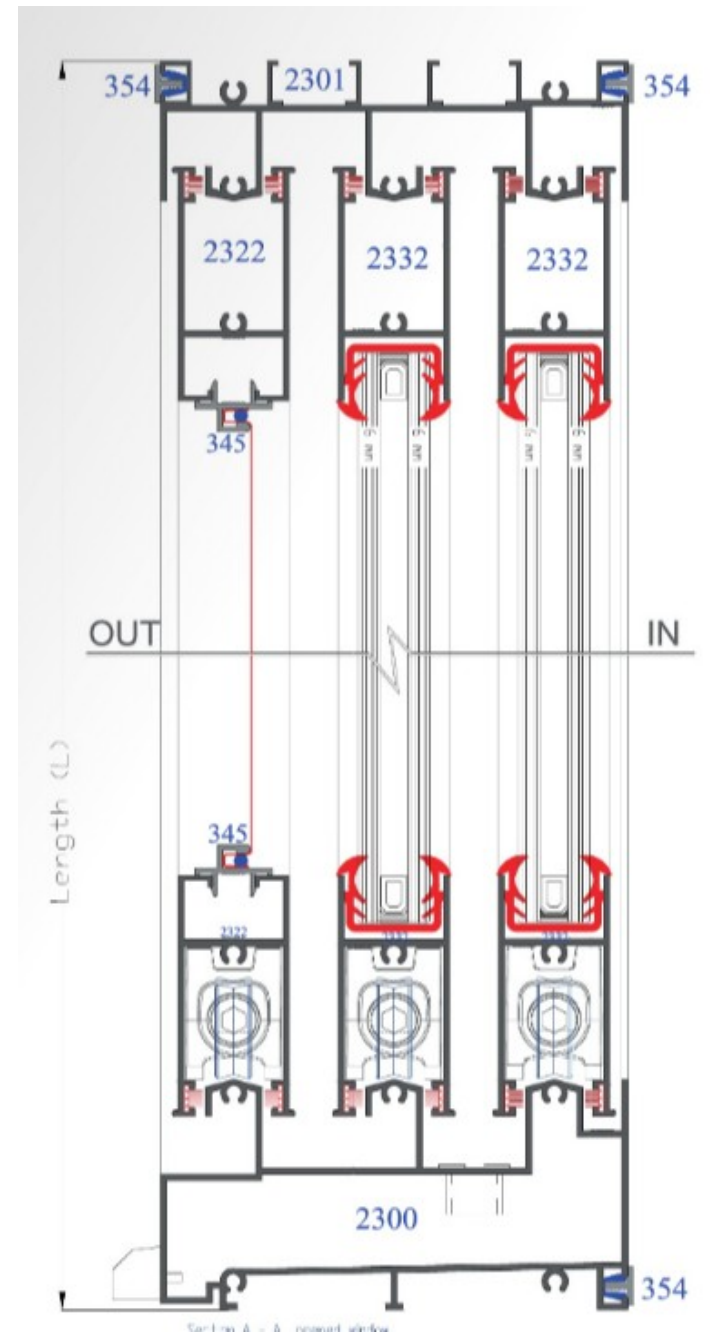

⚙️ Featured System — Sliding Profile 9000

The optimal structural solution for large architectural openings and soaring heights.

- **Application & Scope:** Purpose-engineered for medium-to-large horizontal sliding windows and doors, up to 2.8m in height. Supports 2- or 3-track frames for 2- to 3-panel designs, with seamless integration of fixed and operable sections.
- **Aluminum Thickness:** 1.6mm–1.8mm wall thickness for superior structural durability, load resistance, and weather stability.
- **Double Glazing Technology:** 6mm glass + 12mm insulating spacer — complete protection against rain, dust, and air infiltration, plus advanced acoustic and thermal insulation.
- **Premium Finishes:** 5 architectural colors (Pure White, Luxury Brown, Modern Charcoal, Champagne, Cappuccino) with scratch- and weather-resistant electrophoretic coating.
- **Shutter Compatibility:** Fully compatible with all roller shutter systems — smart motorized or traditional manual control.
- **European-Certified Hardware:** All accessories meet certified European specifications for smooth, long-lasting operation.

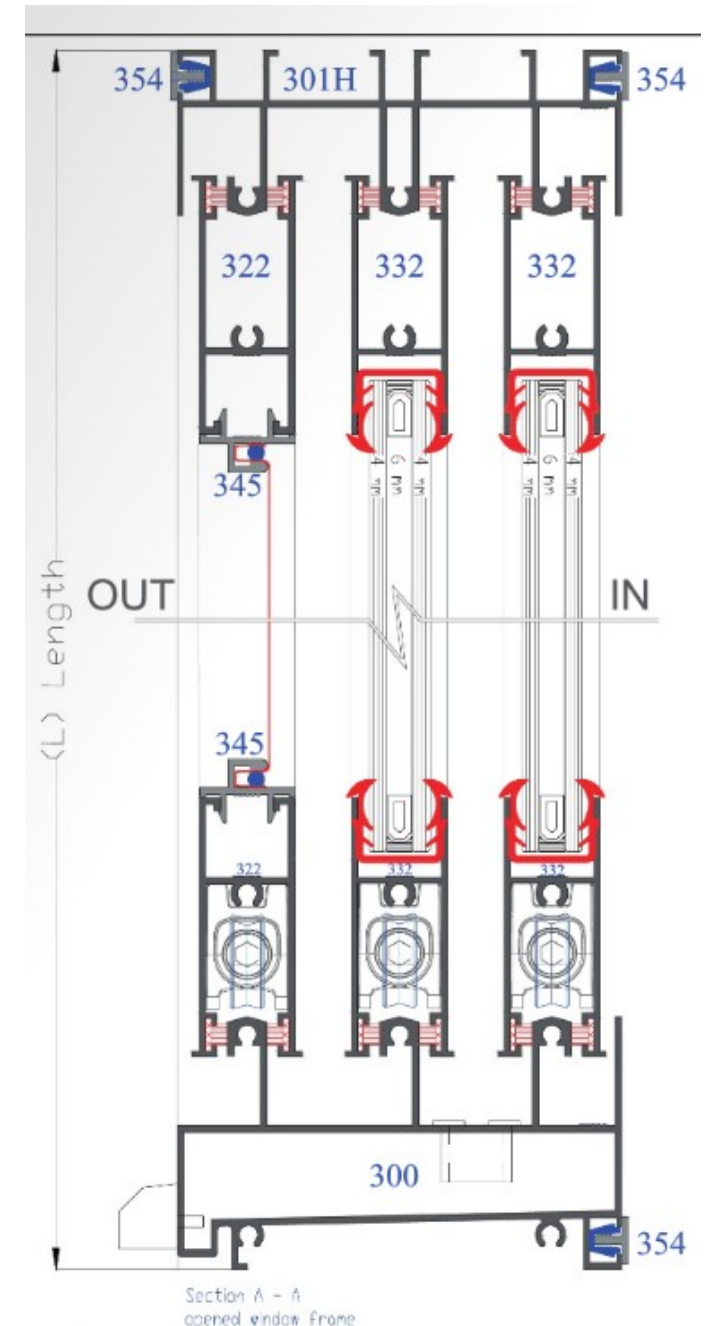

UNITED RESOURCES FOR ALUMINUM

⚙️ Featured System — Sliding Profile 7000

The perfect balance of modern elegance and versatile structural solutions for mid-sized spaces.

- **Application & Scope:** The ideal choice for horizontal sliding windows and doors in medium-sized openings. Multi-track frames (2, 2.5, 3, 4, up to 5 tracks) enable 2- to 5-panel configurations, with full integration of fixed and operable sections in the same unit.
- **Aluminum Thickness:** A sleek yet durable profile at a standard 1.4mm thickness, balancing everyday ease of use with structural rigidity.
- **Double Glazing Technology:** 6mm glass + 6mm insulating spacer — outstanding protection against rain, dust, and air infiltration, plus excellent acoustic and thermal insulation.
- **Premium Finishes:** 5 core architectural colors (White, Brown, Charcoal, Champagne, Cappuccino) with advanced electrophoretic coating for lasting color stability and scratch resistance.
- **Shutter Compatibility:** Seamless integration with all modern roller shutter systems, whether motorized or manually operated.
- **Premium Accessories:** Exclusively sourced hardware to certified European specifications, ensuring smooth operation for the window's full service life.

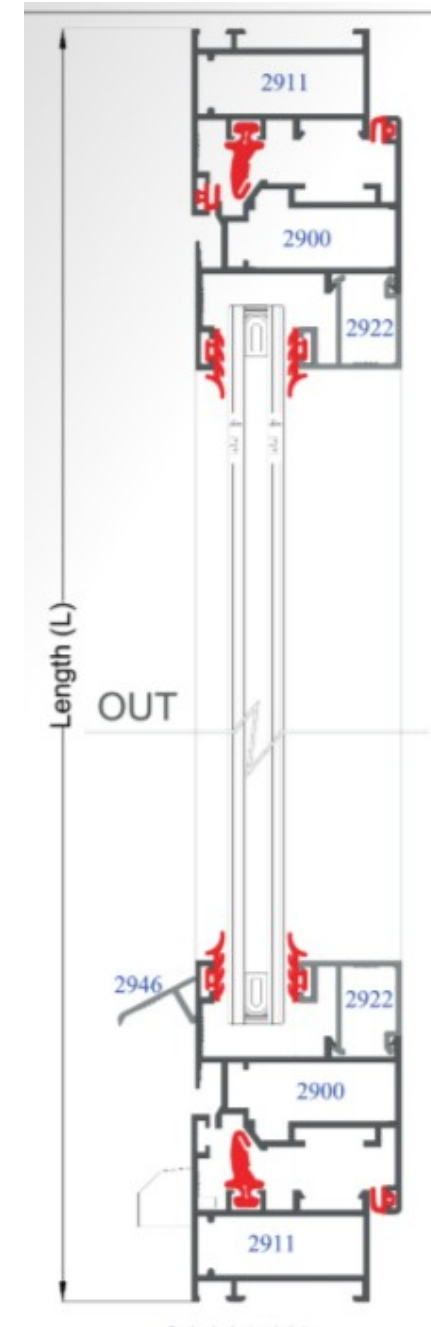

⚙️ Featured System — Hinged System 4500

The comprehensive engineering solution for windows and doors with pivot-mounted hinged sashes.

- **Application & Architectural Flexibility:** The ideal choice for hinged windows and doors with multiple opening styles — side-hung casement, tilt, or advanced Tilt & Turn systems for the most refined architectural designs. Exceptional flexibility for fixed mesh panels, with full integration of fixed and operable sections.
- **Double Glazing Technology:** 6mm glass + 12mm insulating spacer delivers complete protection against rain, dust, and air infiltration, excellent acoustic and thermal insulation, and strong, durable operation with everyday ease of use.
- **Premium Finishes:** 5 elegant architectural colors (White, Brown, Charcoal, Champagne, Cappuccino) with advanced electrophoretic coating for surface protection and lasting color stability.
- **Shutter Compatibility:** Seamless integration with all modern roller shutter and screen systems using smart motorized control.
- **European-Certified Hardware:** All accessories are exclusively sourced to the highest certified European specifications for maximum safety and longevity.

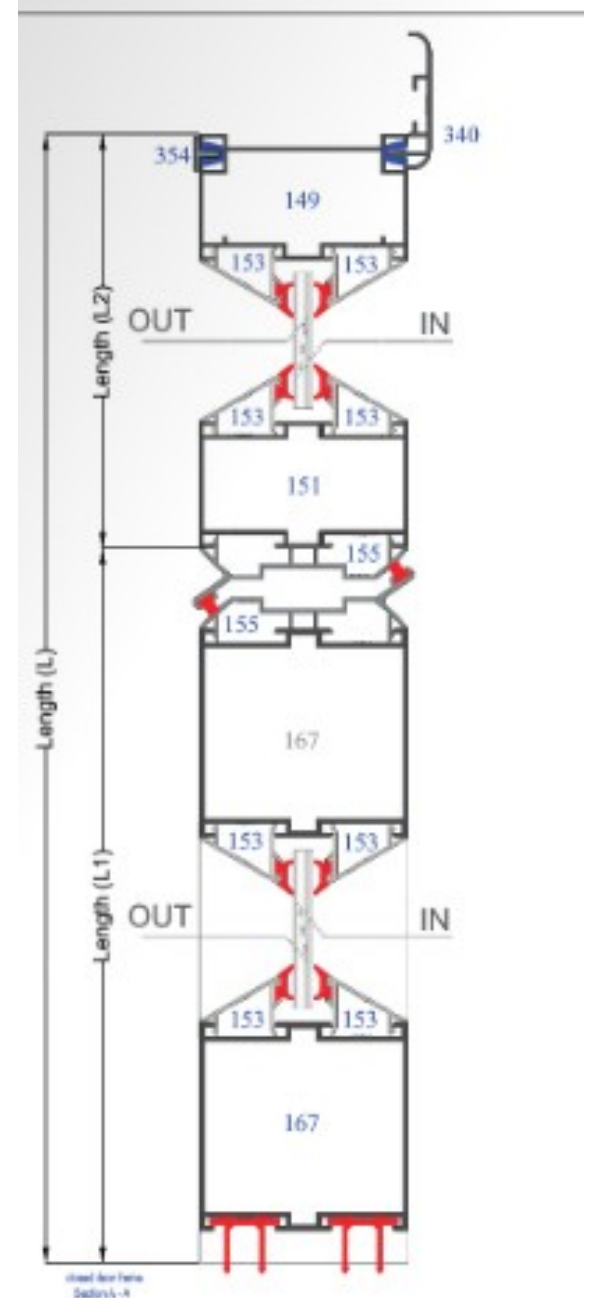

UNITED RESOURCES FOR ALUMINUM

⚙️ Featured System — Doors & Facades 2000

The optimal structural solution for main entrances, interior doors, and commercial facades.

- **Application & Structural Flexibility:** Purpose-engineered for interior doors, main entrance doors, and facades, offering two certified frame/sash dimensions — (66mm/100mm) and (66mm/40mm). Efficiently used for single- or double-leaf doors on durable pivot hinges, opening inward or outward. The ideal choice for interior office partitions, commercial shopfront displays, and building or villa entrances, with the option to integrate fixed facade panels for medium-sized spaces.
- **Aluminum Thickness:** Outstanding structural strength with aluminum thickness ranging from 1.6mm to 1.8mm, ensuring long-term operational performance, ease of installation and daily use, and a refined final aesthetic.
- **Glass Thickness Flexibility:** Highly flexible compatibility with glass thicknesses — from 4mm single glazing up to 14mm, with engineering capacity for glass up to 36mm in special designs requiring superior insulation.
